

Resources to Enable Innovative Research

Key Features of the DZHK Heart Bank

Accessibility	For researchers worldwide
Entities	Liquid & tissue samples, omics data, clinical data, imaging data, biosignals
Time Points	Baseline, various follow-up time points
Governance	Use & Access Policy / data protection, ethics and consent framework

Explore the DZHK Heart Bank

Resource generated by DZHK Studies

Immediately available:
 Clinical Data (DZHK Basic Data Set)
 Liquid Biospecimens (DZHK Set)

Available after the protection period or PI approval:
 Extended Clinical Data
 Imaging Data / Biosignals

Tissue Resource

Immediately available:
 6,000 tissue samples
 EDTA blood
 PAXgene samples
 Linked Basic Data

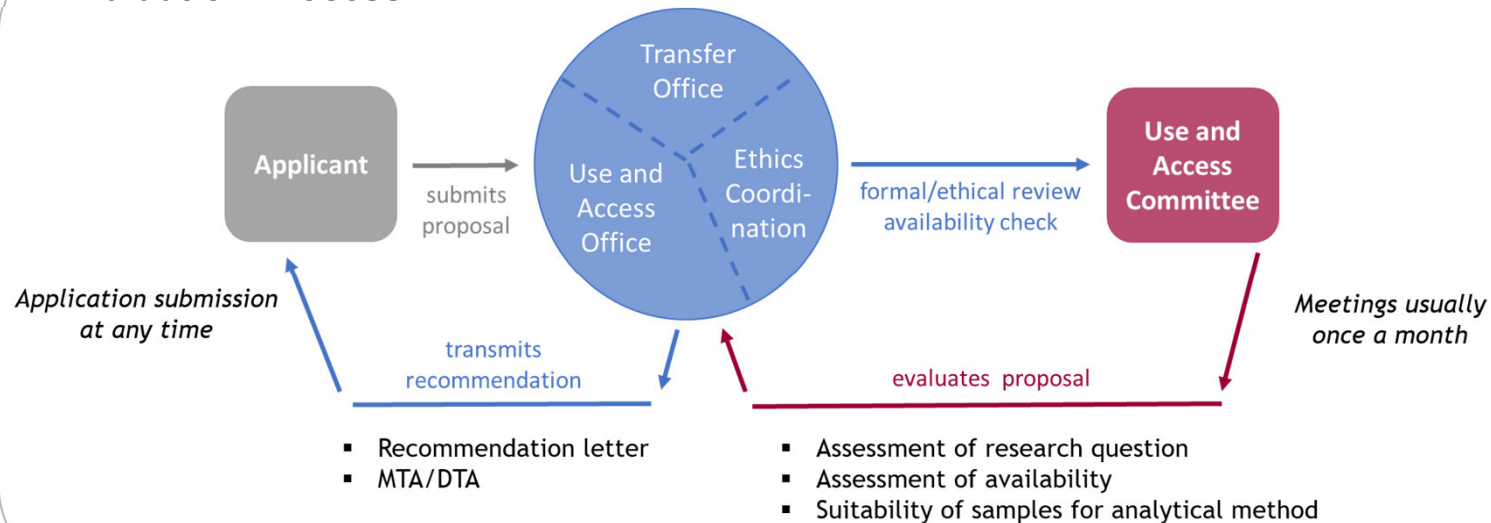

DZHKomics Resource

Immediately available:
 1,300 whole-genome sequences (30x) with 35.8 million SNVs
 7 million InDels + 775 individuals
 26,914 Ensembl genes
 Linked Basic Data

Evaluation, Release and Support

Evaluation Process

What is being assessed?

-  Research question
-  Availability of the requested resources
-  Suitability of the samples for the analytical method

Formal and ethical review, as well as an availability check, are integral parts of the process.

Support services

- ✓ Support in selecting a cohort to answer your research question.
- ✓ Support with questions regarding the application, evaluation, and release process.

Consultation Hours

Tuesday 13:00-14:00, Registration via use.access@dzhk.de

Just give me
all the data!
